

## Electric Boom Lift Attachments

Electric Boom Lift Attachment - The most common label utilized for electric trucks are the type "E" meaning the forklifts meets the lowest standards for fire and electrical hazards. All the trucks which are described as type E are not suitable for use in dangerous sites. Type "ES" lift trucks meet all the standards of Type "E" lift trucks and have other apparatus so as to avoid the emission of sparks and limit the surface temperature of lift truck components.

The more specialized lift trucks are the type "ES" electric vehicle and these are not normally found in the marketplace. Type "EE" trucks meet all the standards of the ES and E model and have all electric motor and spark generating components completely enclosed. The type "EE" model is therefore used where dangerous environments have been identified. Type "EX" forklifts are specially meant for use in atmospheres wherever flammable fibers or dust or vapors can be present. These forklifts are made with no spark producing parts together with various protective measures to be able to guarantee optimum safety in the dangerous applications they may be used for.
