

## Aerial Work Platforms

Aerial Work Platforms - There are different lift truck accessories offered on the market. They can help transform your forklift so that you could expand your ability to pick items up or complete clean up jobs and material handling with out difficulty.

Several of the attachments are specifically designed so as to fit on the blades themselves. Fork extensions for example, are used whenever you require a lot more fork length, which increases lifting capability. Blade extensions come in lengths varying from forty eight to one hundred twenty inches. Rounded or triangular attachments are another kind used whenever moving rolled material in order to make sure it does not roll off of the typical flat forks.

Examples of lifting attachments include pivoting and telescoping crane or boom accessories. They could come in quite a few different kinds and are usually intended for transporting metal bars, lumber, poles and various types of bulky stuff. Additional attachments like for example various kinds of hook plates and hooks are available to be able to lift objects with a chain or sling. Magnetic lifters and slab lifters are other things that can be utilized with hook accessories. Slab lifters are specialized attachments that are intended for lifting various materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools which attach to your forklift so as to make transferring rolls of carpet much easier. The accessory connects onto the forklift's blades and has a pole that goes through the middle of the carpet roll.

There are several various kinds of forklift accessories that could be used for facility maintenance like snow forks. These blades connect to front end loaders and can move materials like soil, snow and dirt. Other popular cleanup attachments comprise magnetic sweepers and standard sweepers. Standard sweepers comprise a broom that the lift truck blades hook onto for sweeping big spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in places where there is lots of metal debris such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up easy and fast.

Material spreaders are other attachments used on forklifts. These spreaders are helpful for a variety of applications like for instance spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Work platforms are another optional lifting attachment which lots of companies utilize everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are some units accessible which are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location using the lift truck. Larger platform units have additional space for staff to carry tools and other essential stuff intended for the task. Usually work platforms are made of steel or ploy material.
