

## Barrel Clamps

Barrel Clamps - A Barrel Clamp is really a mechanical or hydraulic attachment for a lift truck. It could be used to clutch the object you would like to transport utilizing the forklift and is usually utilized for handling paper rolls, barrels, and kegs. Several designs of barrel clamp accessories even have a rotate function. For example, the revolving function allows the one operating the forklift to be able to put in a vertically stored paper into the horizontal intake of a printing press.
